- Biocides
- Cleaners
- Specialty Products

**Product description:** W2E's Clean-In-Place Cleaner is a specialty formulated non-hazardous acidic compound for cleaning filter press cloths, paper machine felt or other application requiring acidification. This cleaner contains a blend of non-hazardous acidic materials and nonionic surfactants that are easily soluble in water to the required solution strength. It is an economical concentrated product that is effective in hard water.

**Typical physical properties:**

Appearance	Clear liquid faint odor
Flash Point	N/A
Density (Pounds per gallon@ 72°F)	9.5
Solubility in water	Complete
pH	1-2
Voc (%wt)	0
Evaporation rate (water=1)	1
Freezing Pt	32°F
Boiling Pt	212°F

**Dosage:** W2E's Clean-In-Place Cleaner should be added to water to obtain desired dilution. The product solutions should be used with chemical resistant materials of construction. Consult your Walla Walla Environmental representative for recommended dilutions, dosage rates, and delivery system required for your system.
